

Have you forgotten something? ...

You have a business but no website?
Is your current website working, or even up-to-date? Do your customers know where you are?

Do they think of you first?

Does your website accurately reflect what you do?

Without a website you're falling behind. A web presence is one of the cheapest forms of advertising, yet has the widest demographic coverage of all. Nowadays most potential customers will search online first, even before asking friends & colleagues

As an industry expert recently stated, "An out of date website is as effective as not having a website at all". Wrong or missing content will switch a potential customer off quickly. Indeed stats show that visitors will only return twice more to your site if there aren't any changes, and then will never return.

TO DO LIST

Coffee

More coffee

Something frozen for dinner

It's important that your web presence reflects your business or interest, identifying you, and turning inquiries into customers.

Gumtree Computer Services can help you maintain your valuable sales and marketing tool. If you're new to us get in touch and we'll talk. If you're already online then you need to know that your web presence is maintained without excessive cost. We'll take care of that problem so you can get on and do what you do best.

As a customer of ours we'll make sure that your web presence is good to go. We take it upon ourselves to keep in touch with you - that's one less item on your agenda to worry about!

The fine print:

- 1 If you wish to retain your current domain and hosting configuration yourself we'll just need authorised access to your site to make the changes.
- 2 Maintenance work is charged at an agreed hourly rate, with a minimum of 1 hour charge per job.
- 3 If more than 75% of your website is modified in a 12 month period it will be suggested we consult with you to reassess or rebuild your web presence.
